

PROJECT DEMONSTRATION

TheChaiShop&Co; • Salesforce CRM Application

Focus: documented development flow, Salesforce components, and learning scope.

01 • Project Development Flow

The project development flow lists the following milestones:

Milestone	Development Step
1	Creation of developer account
2	Object Creation
3	Tabs
4	The Lightning App
5	Global Picklist
6	Fields and Relationships
7	Creation of Page Layout
8	Creation of Record Types
9	Validation rules
10	Email Templates
11	Flows
12	Reports and Dashboards
13	Conclusion

PROJECT DEMONSTRATION

Documented learning scope

02 • What You'll Learn

No.	Topic
1	Real Time Salesforce Project
2	Standard and Custom objects
3	Picklist Value sets
4	Types of Fields & their relationships.
5	Page Layouts
6	Record Types
7	Validation Rules
8	Email Templates
9	Flows
10	Reports and Dashboards.

03 • Demonstration Sequence

SET UP	MODEL	CONFIGURE	AUTOMATE	ANALYZE
Developer account	Objects Fields Relationships	Tabs Lightning App Picklists Layouts Record Types	Validation Rules Email Templates Flows	Reports & Dashboards

04 • Project Context

The project focuses on developing a Salesforce-based CRM system to manage customer, employer, and enterprise accounts efficiently. The system automates sales processes, maintains customer records, generates reports, and improves customer engagement through automated notifications.

05 • Documented Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Database	Salesforce Cloud
Automation	Flows
Backend	Salesforce Platform
Analytics	Reports & Dashboards

PROJECT DEMONSTRATION

CRM capabilities covered by the project

06 • Proposed Solution

Parameter	Description
User Login & Authentication	Allows authorized users to securely log in to the CRM system using valid credentials.
Customer Record Management	Enables users to create, view, update, and delete customer details such as name, contact number, and address.
Employer & Enterprise Management	Allows management of employer and enterprise account information for business operations.
Order Management	Supports creation and tracking of customer orders, including order quantity and product details.
Automated Billing System	Automatically calculates total bill amount using formula fields based on order quantity and pricing.
Validation Rules	Ensures accurate data entry by validating fields such as phone number, PAN, and Aadhaar.
Record Types & Page Layouts	Provides different record types and layouts for various customer and enterprise categories.
Global Picklists	Maintains standardized values for fields such as product type, category, and status.
Email Notification System	Sends automated emails to customers for birthdays, offers, and order confirmations.
Workflow & Flow Automation	Automates tasks such as updating records and triggering alerts using Salesforce Flows.
Report Generation	Generates detailed reports on sales, customers, and enterprise performance.
Dashboard Visualization	Displays real-time analytics through interactive dashboards and charts.
Data Backup & Recovery	Ensures secure storage and recovery of business data in the Salesforce cloud.
User Role Management	Controls system access using profiles and permission sets for different users.

PROJECT DEMONSTRATION

Architecture and data flow

07 • Solution Architecture

Presentation Layer	Application Layer	Data Layer	Analytics Layer
Lightning UI	Flows and Logic	Custom Objects	Reports & Dashboards

08 • Data Flow

User → Salesforce UI → Custom Objects → Validation Rules → Flows → Reports → Dashboards

09 • Architecture Notes

This layered architecture ensures modularity, scalability, and maintainability.

10 • Technology Stack

Layer	Technology
Frontend	Salesforce Lightning
Database	Salesforce Cloud
Automation	Flows
Backend	Salesforce Platform
Analytics	Reports & Dashboards
